JSAT MOBILE Introduces the Inmarsat SwiftBroadband Service in Japan  
with a Prestigious Launch Customer

Tokyo, February 26, 2014 – JSAT MOBILE Communications Inc. (“JSAT MOBILE”), a joint venture of SKY Perfect JSAT Corporation and Inmarsat Solutions, announced that JSAT MOBILE will commence the provision of Inmarsat SwiftBroadband (“SBB”) services to the Japanese market, starting from March 2014.

Cooperating with ALL NIPPON AIRWAYS CO.,LTD (“ANA”), JSAT MOBILE is partnering with OnAir Switzerland Sàrl (“OnAir”, Switzerland, Chief Executive Officer: Ian Dawkins) to provide OnAir’s inflight Wi-Fi service “Internet OnAir” on ANA’s Japanese registered aircraft. Internet OnAir enables Wi-Fi connectivity, providing passengers with email, Internet browsing and social media updates over Wi-Fi compatible devices such as smartphones and tablets.

Inmarsat SBB service provided by JSAT MOBILE features:

### Satellite Broadband Communication Service for Aircraft

By installing the cutting edge Inmarsat satellite communications gateway on board, the SBB service enables high speed data communication of up to 432kbps per data channel throughput between an aircraft in flight and the ground anywhere in the world. JSAT MOBILE has newly obtained the required radio license from the Ministry of Internal Affairs and Communications of Japan to provide the SBB service to Japanese customers.

### Service Coverage

The SBB service is built over the backbone of one of the world's largest satellite communication networks - the Inmarsat I-4 satellite constellation, comprised of three geostationary satellites that provide near-global coverage. In addition, OnAir has regulatory approvals from nearly 100 countries and roaming agreements with over 350 mobile network
