SKY Perfect JSAT Procures JCSAT-15 and JCSAT-16 Satellites

Tokyo, April 17, 2014 -SKY Perfect JSAT Corporation (Head Office: Minato-ku, Tokyo; Representative Director, President & Chief Executive Officer: Shinji Takada) announced that it has entered into an agreement with Space Systems/Loral (Head Office: Palo Alto, California, US; President: John Celli) for procurement of its new JCSAT-15 and 16 satellites.

In addition to JCSAT-14, for which an agreement was concluded last June, both JCSAT-15 and JCSAT-16 satellites will be constructed by Space Systems/Loral.

JCSAT-15 will succeed and replace N-SAT-110, being used at 110 degrees east longitude for broadcasting of the multichannel pay TV service SKY PerfectTV!.

JCSAT-16 will function as an in-orbit back-up satellite to the existing services in the Ku- and Ka-band for the Japanese market, enabling the provision of more stable satellite services and further strengthening the foundations of SKY Perfect JSAT Corporation's business.

SKY Perfect JSAT Corporation will continue to make investments in a timely manner in order to further enhance and increase the reliability of its communications and broadcasting services.
