SCC Announces to Start New IP communications Service, “Portalink”

Space Communications Corporation (SCC, Headquarters: Shinagawa-ku, Tokyo, President: Yutaka Nagai) announces to start offering “Portalink” service which enables high-speed video transmission with a dedicated VSAT(*) system.

(*) very small aperture terminal

The Portalink is an occasional-use service to realize IP data transmission at 6Mbps (max) with a small and lightweight terminal (less than 20kg). This service is used to transmit news gathering content in TV news shows. It can also offer internet access and IP phone services on location. Advantages of the service are as follows:

- | | |
|----------------|--|
| 1. Portability | very small and lightweight terminal (less than 20kg) |
| 2. Operability | easy set up, easy satellite acquisition and easy operation |
| 3. Broadband | at speed of 6Mbps (max) for HDTV transmission |
| 4. Versatility | wide array of applications |

Appearance of the Portalink VSAT

<Service Tariff>
